SCOURGE® INSECTICIDE with RESMETHRIN/PIPERONYL BUTOXIDE 4%+12% MF FORMULA II

SECTION 1. CHEMICAL PRODUCT AND COMPANY INFORMATION

Product Name: SCOURGE® INSECTICIDE with RESMETHRIN/PIPERONYL BUTOXIDE 4%+12% MF FORMULA II

Chemical Family

Product Use: A ready to use synthetic pyrethroid for effective adult mosquito (including organophosphate resistant species), midge (biting and non-biting) and black fly control. This product has a restricted use classification and can be used only by Certified Applicators or persons under the supervision of such applicators.

For Product Information call 1-800-331-2867

SECTION 2. COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous Component Name | CAS No. | Concentration % by Weight Minimum | Concentration % by Weight Maximum
--- | --- | --- | ---
Resmethrin Technical | 10453-86-8 | 3.9300 | 4.3500
Piperonyl Butoxide, Technical | 51-03-6 | 10.3800 | 13.0400
Petroleum distillate | 64742-55-8 | |

SECTION 3. HAZARDS IDENTIFICATION

NOTE: Please refer to Section 11 for detailed toxicological information.

Emergency Overview: Caution! Harmful if swallowed or absorbed through skin. Avoid contact with skin, eyes and clothing. Highly toxic to fish.

Physical State: Liquid

Odor: Mild Solvent
Appearance
Gold to Amber

Immediate Effects
Eye
Avoid contact with the eyes.

Skin
Harmful if absorbed through skin. Do not get in eyes, on skin, or on clothing.

Ingestion
Harmful if swallowed. Do not take internally.

SECTION 4. FIRST AID MEASURES

General
Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Eye
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

Skin
Take off all contaminated clothing immediately. Rinse immediately with plenty of water for at least 15 minutes. Call a poison control center or doctor for treatment advice.

Ingestion
Call a physician or Poison Control Center immediately. DO NOT induce vomiting unless directed to do so by a physician or poison control center. Do not give liquids to drink. Do not give anything by mouth to an unconscious or convulsing person.

Inhalation
Move to fresh air. Call a poison control center or doctor for further treatment advice.

Notes to Physician

Signs and Symptoms
Symptoms might include transient headache, dizziness, stuffy or runny nose and scratchy throat.

Hazards
This product contains a synthetic pyrethroid.

Do not induce vomiting: contains petroleum distillates and/or aromatic solvents. Aspiration may be a hazard.

Treatment
To prevent aspiration of swallowed product, lay victim on side with head lower than waist. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered. If ingested and vomiting has not occurred, emesis should be induced with supervision.

Do not administer milk, cream or other substances containing vegetable or animal fats, which enhance the absorption of lipophilic substances. Cold cream or a moisturizing cream has been successful in diminishing the sensations associated with localized paresthesia. If localized paresthesia develops, the site should be thoroughly washed with soap and water.
SECTION 5. FIRE FIGHTING MEASURES

Flash Point
> 93 °C / > 199 °F
Method: Tagliabue Closed Cup

Suitable Extinguishing Media
Carbon dioxide (CO2), Dry chemical, Foam, Water

Fire Fighting Instructions
Isolate hazard area. Cool containers with water from the fartherest possible distance away. In the event of fire and/or explosion do not breathe fumes. Hose down gases, fumes and/or dust with water. Move containers from fire area if without risk. Use flooding amounts of water as a fog.

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH approved (or equivalent) and full protective gear.

SECTION 6. ACCIDENTAL RELEASE MEASURES

General and Disposal
Use proper protective equipment to minimize personal exposure (see Section 8). Take all necessary action to prevent and to remedy the effects of the spill. Any disposal practice must be in compliance with all Federal, State/provincial, and local laws and regulations.

Keep unnecessary people away, isolate hazard area and deny entry. Avoid contact with spilled product or contaminated surfaces.

Land Spill or Leaks
Do not flush into surface water or sanitary sewer system. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Place in an approved chemical waste container for disposal. Rinse spill area with small amount of soapy water. Rinse away with water

Remove all sources of ignition. To avoid ignition of vapours by static electricity discharge, all metal parts of the equipment must be grounded. Stop leak if you can do so without coming into contact with spilled material. Dike far ahead of liquid spill for later disposal. Prevent entry into waterways, sewers, basements or confined areas. Inform appropriate authorities immediately if contamination occurs. Contact Bayer for further assistance if necessary.

SECTION 7. HANDLING AND STORAGE

Handling Procedures
Avoid contact with skin, eyes and clothing.

Storing Procedures
Do not contaminate water, food, or feed by storage or disposal. Store in original container and out of the reach of children, preferably in a locked storage area.

Work/Hygienic Procedures
Wash thoroughly with soap and water after handling.
SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls
Ensure adequate ventilation, especially in confined areas.

Eye/Face Protection
Splash goggles

Hand Protection
Suitable chemical resistant gloves

Body Protection
Wear long-sleeved shirt and long pants and shoes plus socks.

Respiratory Protection
When respiratory protection is necessary under the conditions of use, wear a respirator approved for pesticides by the National Institute for Occupational Safety and Health (NIOSH).

General Protection
Eye wash facility and safety shower should be available.

Exposure Limits
None Established

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Gold to Amber

Physical State
Liquid

Odor
Mild Solvent

Specific Gravity
0.87 at 22 °C

Bulk Density
7.23 lb/gal
at 22 °C

Water Solubility
Insoluble

Viscosity
34.3 mPa.s 21 °C

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability
Stable

Conditions to Avoid
Exposure to extreme heat.
Sources of ignition

Incompatibility
Strong reducing agents
Strong oxidizing agents

Hazardous Decomposition Products
Thermal decomposition
Carbon monoxide
Carbon dioxide (CO2)

Hazardous
Will not occur.
SECTION 11. TOXICOLOGICAL INFORMATION

The ACUTE TOXICITY Data were developed with a similar material SCOURGE Insecticide with SBP-1382/Piperonyl Butoxide 19% + 54% MF Formula II (EPA Reg. No. 432-667), which contains 18% Resmethrin and 54% Piperonyl Butoxide. Other data was developed with Resmethrin and Piperonyl Butoxide, the active ingredients.

**Acute Oral Toxicity**
- Rat: 2,700 mg/kg

**Acute Dermal Toxicity**
- Rabbit: > 2,000 mg/kg

**Acute Inhalation Toxicity**
- Rat: > 2.64 mg/l 4 h

**Skin Irritation**
- Rabbit: slight irritation

**Eye Irritation**
- Rabbit: non-irritant

**Sensitization**
- Guinea pig: non-sensitizing

**Subchronic Toxicity**
- The NOEL established for resmethrin in a 90-day inhalation study with rats was 0.1 g/m3 or 0.1 mg/L. The NOEL for resmethrin was 10 mg/kg/day in the diet when fed to dogs for 180 days. Rats tolerated diets containing 5000 ppm of piperonyl butoxide without adverse effects for 17 weeks.

**Chronic Toxicity**
- Resmethrin was not considered to be oncogenic based on chronic feeding studies conducted in rats and mice.

A statistically significant increase in the number of benign liver tumors appeared in mice fed piperonyl butoxide technical at doses which far exceed any anticipated daily human intake. Independent and industry toxicological experts who have reviewed the data agree that the findings of the study do not indicate a health risk to human beings.

**Assessment Carcinogenicity**
- ACGIH: None
- NTP: None
- IARC: Piperonyl Butoxide, Technical, 51-03-6
- OSHA: None

**Reproductive & Developmental Toxicity**
- No effects on reproductive parameters were observed when diets containing up to 500 ppm resmethrin were fed to rats over two successive generations. Resmethrin is not considered to be teratogenic based on studies conducted in rabbits and rats.

- Reproductive performance and offspring development in rats were unaffected when piperonyl butoxide was fed at dietary concentrations of up to 1000 ppm
over two successive generations. Piperonyl Butoxide was not considered to be fetotoxic or teratogenic based on a study in rabbits.

### Neurotoxicity

Resmethrin is not considered to be a neurotoxin based on rat feeding studies conducted for up to 32 weeks.

### Mutagenicity

Resmethrin is not considered to be mutagenic based on in vitro studies conducted with bacteria and yeast.

---

### SECTION 12. ECOLOGICAL INFORMATION

#### Acute and Prolonged Toxicity to Fish

#### Toxicity to other organisms

**Acute Oral**

The value mentioned relates to the active ingredient resmethrin.

- California Quail
  - LD50: > 2,000 mg/kg

- Japanese quail
  - LC50: > 5,000 ppm

- Mallard duck
  - LC50: > 5,000 ppm
Environmental Precautions

Highly toxic to fish. For terrestrial uses, do not apply directly to water, or to areas where surface water is present, or to intertidal areas below mean high water mark. Drift and runoff from treated areas may be hazardous to fish/aquatic organisms in adjacent sites. Consult your State’s Fish and Wildlife Agency before treating water areas. Do not contaminate surface or ground water by cleaning equipment or disposal of wastes, including equipment wash water.

Ecological Information

For ecotoxicological data call the product information phone number listed in Section 1.

SECTION 13. DISPOSAL CONSIDERATIONS

General Disposal Guidance

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal

Triple rinse containers. Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or incineration, or if allowed by State and Local authorities, by burning. If burned, stay out of smoke.

RCRA Classification

Not Regulated under this Statute
